

ABIN1

Full Name:

ABIN1 (1-560 mouse)

Long Name Text:

A20-binding inhibitor of NF-kB 1

Immuno Sequence:

ABIN1 (1-560 mouse) GST cleaved [DU 12906]

DU Number of Antigen:

DU12906

Aliases

TNIP1

Sheep No:

S345C

Tag Information

GST tag has been cleaved.

Monoclonal/Polyclonal:

Polyclonal

Purification Method:

Affinity purified against recombinant protein GST-ABIN1 (1 – 560 mouse).

Gel Image:

Raw (264.7) cell extracts (1mg protein) were immunoprecipitated with increasing amounts of sheep anti-mouse ABIN1 (s345c) antibody (lanes 1-3) or pre-immune serum (lane 4) for 2h along with 10 ul of protein G. Immunoprecipitated proteins were denatured in SDS and subjected to SDS-PAGE on 8% gels. Lanes 5-8 indicated the amount of mouse ABIN1 protein remaining in the supernatant after immunoprecipitation, the amounts loaded being equivalent to 20 ug of cell extract protein. Proteins were transferred to PVDF membrane and immunoblotting was carried out for 2h at room temperature using 0.3 ug/ml anti-mouse ABIN1 antibody (s345c).

Price per aliquot (100µg):

£110.00
