

## TRIAD1

Full Name:

**TRIAD1 (1 - 493)**

Long Name Text:

**TRIAD domain containing protein 1 (Drosophila Ariadne homolog 2)**

Immuno Sequence:

**TRIAD1 (1 - 493 GST cleaved)**

Phosphopeptide:

**TRIAD1 (1 - 493 GST cleaved)**

Aliases

**ARIH2**

Sheep No:

**S821C**

Tag Information

**GST tag has been cleaved.**

Monoclonal/Polyclonal:

**Polyclonal**

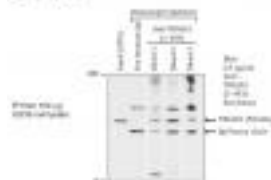

Purification Method:

**Affinity purified against recombinant protein GST- TRIAD1 (1 – 493) [DU 20431].**

Gel Image:

***Detects single band of expected size (58 kDa). Can detect TRIAD1 in HEK293, U2OS and DT40 (chicken) cell lines. Can detect TRIAD1 in mouse kidney, heart, liver, brain, testis, muscle, spleen and lung tissues.***

***20 ug of antibody non-covalently coupled to Protein G-Sepharose successfully immunoprecipitated endogenous TRIAD1 from 100 ug of cell lysate.***

Publication:

[TRIAD1 and HHARI bind to and are activated by distinct neddylated Cullin-RING ligase complexes.](#)

Price per aliquot (100µg):  
**£110.00**
