

Antibody Datasheet

Product description:- Anti-FOXO3a phospho Ser 7

Antigen:- EAPAS*PVPL
[where * is phospho Serine, residues 3 – 11 of mouse]

Sheep Number:- S355B

Bleed Number:- Second Bleed

Concentration:- 0.12 mg/ml
1

Formulation:- Phosphate Buffered Saline

Storage temperature:- -20 °C

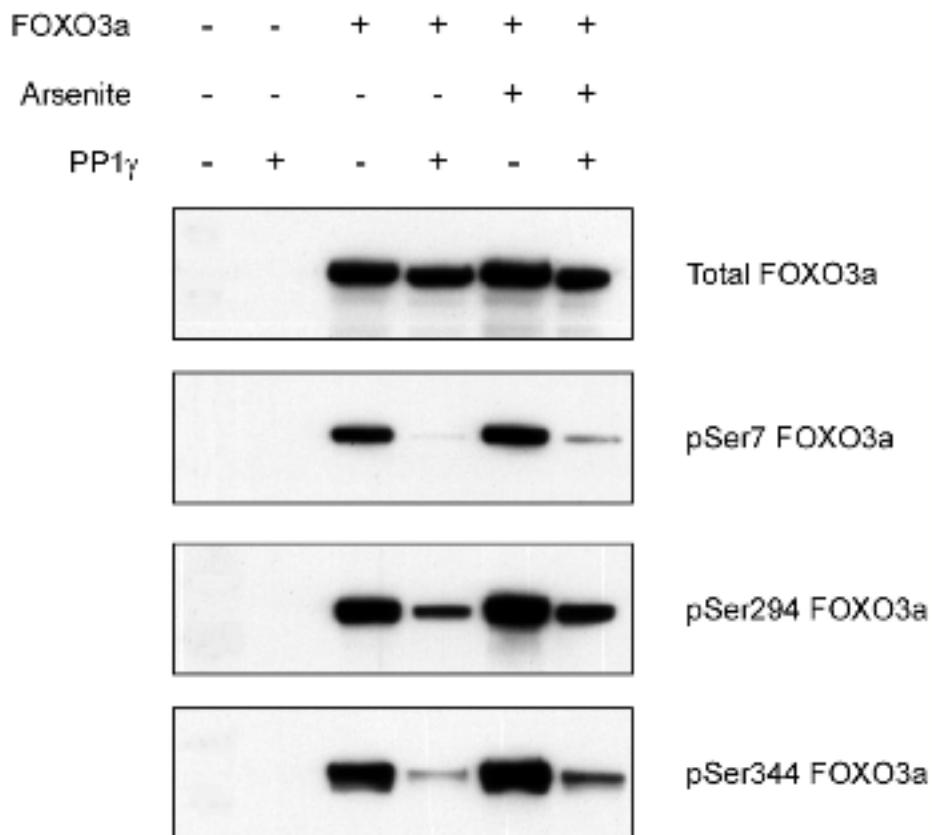

Purification Method:- Affinity purified against phospho peptide

Working Concentration:- 1 μ g/ml for immuno blotting after immunoprecipitation
Include the non-phosphorylated form of the peptide
immunogen at 10 μ g/ml to the diluted antibody

This antibody only recognises transfected material

Publication Reference:-

Unpublished – Therefore please treat this information as highly confidential

pCMV5-Flag-FOXO3a was transfected into HEK293 cells and cells were serum starved overnight and stimulated with or without arsenite (0.5 M) for 60 mins. Flag-FOXO3a was immunoprecipitated from 100 μ g of cell lysate using an anti-Flag antibody (Sigma). The immunoprecipitate was split into twice, with one half treated with or without 1 mU of PP1 gamma for 30 mins at 30 °C. Samples were subjected to SDS-PAGE analysis before being transferred to nitrocellulose membrane and immuno blotted with the appropriate phospho specific antibody at 1 μ g/ml or anti-FOXO3a (Upstate).

Binding of the primary antibody was detected using rabbit peroxidase conjugated anti-sheep IgG antibody (1 in 10,000 dilution, Pierce) followed by enhanced chemiluminescence (ECL, Amersham).
