

S426D ALK5 (141 – 172) [EP 4719]
1st bleed purified

Can detect endogenous and transfected, but still lags behind the commercial in detecting subtle differences and more importantly high molecular weight ubiquitylated ALK5

S427D ALK5 (161 – 185) [EP 4720]
1st bleed purified

Only detects transfected ALK5
