

## Rab8A

Full Name:

**Rab8A**

Long Name Text:

**RAB8A, member RAS oncogene family**

Immuno Sequence:

**MBP-Rab8A [Du 16222]**

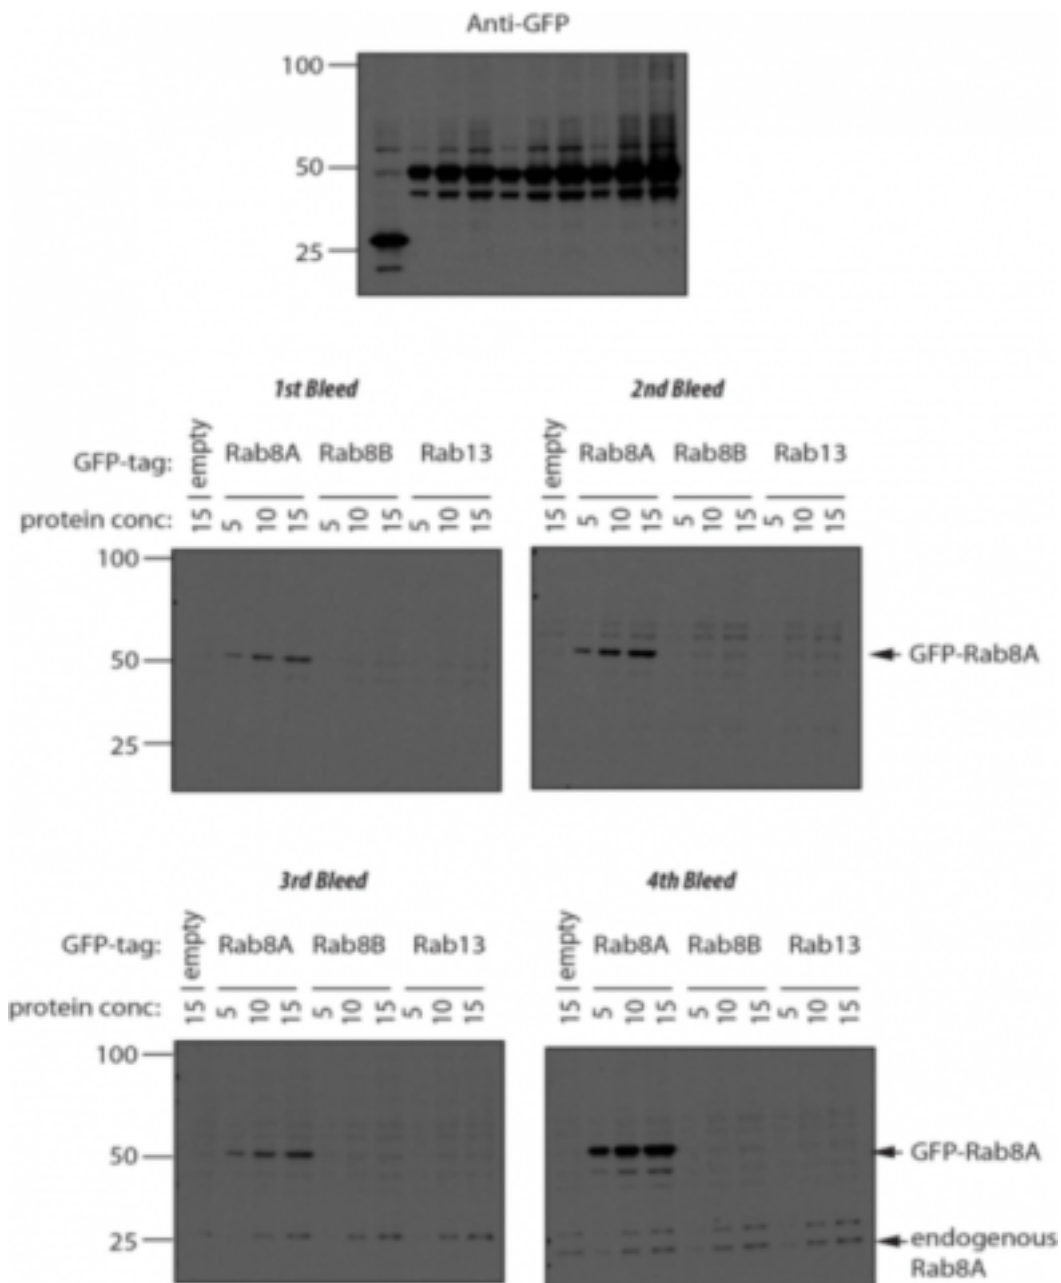

Sheep No:

**S804D**

Monoclonal/Polyclonal:

**Polyclonal**

Gel Image:

**HeLa Flp-in Trex cells stably expressing GFP-empty, GFP-Rab8A, GFP-Rab8B and GFP-Rab13 were induced by Doxycycline (0.1?g/ml) for 24h. The indicated protein extracts were subjected to SDS-PAGE analysis before transferred to nitrocellulose membrane and immunoblotted with Anti-GFP antibody or anti-Rab8A antibodies (bleed 1-4) overnight. Binding of the primary antibody was detected using anti-sheep (1:10,000) and visualised with ECL. Note: Only detect overexpressed Rab8A, the 4th bleed may detect endogenous Rab8A.**

Date Added:  
**October 2014**

Price per aliquot (100µg):  
**£110.00**
